Welcome

## **Welcome to Villa Claire!**

Thank you for choosing Villa Claire. It is a pleasure to have you staying with us. To make your stay as comfortable and safe as possible, we would be grateful if you could take a few minutes to read this information folder.

Please find in here some background information, practical information, do's and don'ts, places of interest, activities and a map of the surroundings.

We hope you enjoy your stay.

Kind Regards,  
Thierry and Buscotine

## **Villa Claire, and how it started.**

Welcome, we are Thierry and Buscotine and bought Villa Claire, partially built in 2011. We wanted to integrate it, in full respect of the local nature and materials.

We chose the local palissander wood for the floors and ceilings we bought the local stones from the stone quarry at the rear of Table Mountain “Andatab” (Montagne de la table/ Tafelberg like in South Africa Cape Town), visible at the rear side of the villa from the star observation terrace.

We installed in this part of Madagascar because we remarked after 5 years travelling around; the climate is one of the best in the world. Never cold (Min +18°C at night in July and max +32°C during daytime in January) and never too hot, nor humid.

The villa is built upside the highest dune of Ankilibe, so you can enjoy ocean view and even mountain view from the house, terraces and swimming pool. An agreeable sea breeze is always present.

Villa Claire is fully equipped with solar energy. We don't use generators (grid not available). There is 110KW/D available in the batteries which are kept fully charged with the solar panels (10,8KW/p). So no pollution!
